

On-Campus Recruiting Tracker

Logan Short
@loganmshort

What is the OCR Tracker?

The Washington University in St. Louis Career Center has recruiters from various industries come into our office to recruit students. We do not have a good tool to have these recruiters sign in and provide us with their contact info, their alumni status, or whether this is their first time recruiting. An auto email will be sent to recruiters to fill out a survey of their experience.

Features

- Auto e-mail to recruiters once they sign in
- Batch options to mass email recruiters
- Batch options to export to Excel spreadsheet

Planning - User Stories

"As a Employer Relations team member, I want to contact recruiters to send a survey link."

"As a Employer Relations team member, I want to recruiters info because the rep I speak to from the company about on-campus recruiting is different from the recruiter who comes in."

Planning - Database

I only need one table for my database. This table will have a header row of: Company, First Name, Last Name, Email, Job Title, First-Time Recruiting (yes or no), Alumni (yes or no), and Date. Each row will be able to be checked for batch options. The table will be sortable. Data will come from recruiter form inputs.

Technology Stack

- Java
- IntelliJ, Spring Boot
- Thymeleaf
- MAMP
- Bootstrap, EasyXLS

No demo available

*Wireframes below

- Recruiter Sign In

<https://github.com/loganmshort/liftoff-assignments/blob/master/Employer%20Sign-In%20Page.png>

- Employer Relations Side

<https://github.com/loganmshort/liftoff-assignments/blob/master/ER%20Team%20Member%20Side.png>

- OCR Tracker Login

<https://github.com/loganmshort/liftoff-assignments/blob/master/Login%20for%20OCR%20Tracker.png>

What I Learned

- Integrating Microsoft components like Excel are more compatible with C#, but not impossible with Java
- I might have to use JavaMail API for the auto email

What's Next

- I need to finish the project and get it to a MVP
- Once project is functional, I will customize CSS a bit to match WashU brand standards
- I want to build a Career Readiness assessment/quiz for students so they can gauge their progress and get tips to improve.
